

**DISCOVERY SPORTS CENTER
AUTHORIZATION, RELEASE AND INDEMNIFICATION AGREEMENT**

Medication Storage and Administration Policy

The Discovery Sports Center (DSC) discourages the administration of medication during program hours. To the extent possible, participants should take their medication before or after the program. The DSC will not knowingly permit a participant to take any medication (prescription or over the counter) during program hours without his/her parents' and physician's authorization.

After the DSC receives the appropriate authorizations, staff will store the medication in a secure area accessible only to DSC personnel unless the participant's parents and physician permit him/her to carry the medication during program hours and certify that he/she can safely carry and self-administer the medication.

A participant can take only medication that he/she has taken before without negative reaction.

A parent must hand-deliver the medication to the executive director or authorized management unless the participant is authorized to carry the medication.

All medication must be in the original pharmaceutical container and labeled with the participant's name, medication name, dosage schedule and expiration date.

In most situations, the DSC cannot store medication requiring refrigeration.

Parents must provide any measuring utensils needed to administer the medication, labeled with the participant's name.

DSC staff will not break pills in half; pills must be broken in half before delivering the medication.

Parents should not provide more medication than is necessary for the program sessions. A parent must collect any unused medication within one week after the physician's order expires. The DSC will destroy unclaimed medication.

Parents must submit a new authorization each program session and whenever there is a change in the dosage or medication the participant is to take the medication.

DSC personnel will not administer or oversee the administration of any medication to a participant, but DSC personnel will administer epinephrine injections with the authorization of his/her parents. DSC personnel are not health-professionals; they are not trained observers and cannot observe for the development of symptoms before administering the injection. DSC staff will call the rescue squad when a participant takes epinephrine, regardless of whether the participant exhibits any symptoms of anaphylaxis.

DSC personnel may only give pre-measured doses of epinephrine. If the physician order includes a repeat injection, the parents must supply two pre-measured doses.

PART I-TO BE COMPLETED BY PARENT OR GUARDIAN

Participant's name: _____

Check each box that applies:

- I authorize my son/daughter/ward to take medication as directed by his/her physician in part II.
- I authorize my son/daughter/ward to carry medication during program hours as directed by his/her physician in part II. He/she can safely carry and self-administer the medication.
- I authorize Discovery Sports Center personnel to administer epinephrine injections for my son/daughter/ward as directed by his/her physician in part II.

I have read the medication storage and administration policy outlined above and assume the responsibilities indicated. I agree to release, indemnify and hold harmless Discovery Sports Center, MD SoccerPlex, Maryland Soccer Foundation and their agents, sponsors and employees from all liability arising from this authorization.

PART I-TO BE COMPLETED BY PHYSICIAN

Diagnosis: _____

Medication: _____

Dosage Schedule during program: _____

If p.r.n., specify when indicated: _____

Side effects: _____

Duration of Order: (not to exceed current program) _____

Epinephrine Injection

Immediately after report of exposure to _____
give the injection indicated below.

- Epi-pen (given in pre-measured dose of 0.3 mg epinephrine 1:1000 aqueous solution, (0.3 cc)).
- Epi-pen Jr. (given in pre-measured dose of 0.15 mg epinephrine 1:2000 aqueous solutions, (0.3 cc)).
- Ana-Kit (given in pre-measured dose of 0.3 Epinephrine 1:1000 aqueous solution, (0.3 cc)).
- Repeat dose of epinephrine in 15 minutes if rescue squad has not arrived.

Authorization for participant to carry and self administer

- This participant may carry this medication with him/her during recreation hours. I believe that he/she has received adequate information on how and when to use this medication and that he/she can safely carry and self-administer the medication.

Date

Physician Signature

PART III-TO BE COMPLETED BY THE PROGRAM COORIDATOR OR AUTHORIZED DESIGNEE

- Parts I and II above are completed including signatures. (Physician may complete Part II on his/her stationery or prescription pad.)
- DSC can accept medication (e.g. medication is in the original pharmaceutical container and properly labeled; parents provided any measuring utensils needed to administer the medication, labeled with the participant’s name, etc.)

Parents must collect any unused medication by _____(within one week after expiration of the physician order).
